Int 21H, AH=02H

Version

1 and higher

Brief

WRITE CHARACTER TO STANDARD OUTPUT

Family API

DosWrite

Input

```
AH = 02h
DL = character to write
```

Return

```
AL = last character output (despite the official docs which state nothing is
returned) (at least DOS 2.1-7.0)
```

Notes

^C/^Break are checked, and INT 23 executed if pressed standard output is always the screen under DOS 1.x, but may be redirected under DOS 2+

the last character output will be the character in DL unless DL=09h on entry, in which case AL=20h as tabs are expanded to blanks

if standard output is redirected to a file, no error checks (write-protected, full media, etc.) are performed
