Int 21H, AH=37H, AL=02H

Version

2.x and 3.3+ only

Brief

get availdev flag

Family API

Input

```
      AH = 37h
      AL = 02h get availdev flag
```

Return

AL = status

```
          00h successful
          FFh unsupported subfunction
```

DL = 00h \DEV\ must precede character device names

```
                            = nonzero \DEV\ is optional
```

Macro

Notes

all versions of DOS from 2.00 allow \DEV\ to be prepended to device names without generating an error even if the directory \DEV does not actually exist (other paths generate an error if they do not exist); DOS 2.x has an AVAILDEV= option in CONFIG.SYS to make \DEV mandatory

although MS-DOS 3.3+, DR DOS 3.41+, and Novell DOS 7 accept these calls, they have no effect, and AL=02h always returns DL=FFh (except for Novell DOS 7, which leaves AX unchanged for both subfunctions)
