19

Brief

Set current directory

Input

- DS:DX → ASCIZ pathname to become current directory (max 64 bytes)

Return

- CF clear if successful
  - AX destroyed
- CF set on error
  - AX = error code (03h) (path not found)

Notes

if new directory name includes a drive letter, the default drive is not changed, only the current directory on that drive

changing the current directory also changes the directory in which FCB file calls operate
